## Press Release

### **Cadorath Achieves Milestone with Delivery of First Overhauled and Tested M250C30P Engine to Meridian Helicopters**

Cadorath has marked a significant achievement by delivering its first fully overhauled and tested Rolls-Royce M250C30P engine to Meridian Helicopters. This milestone delivery aligns with Cadorath's recent elevation to an Authorized Maintenance Repair and Overhaul Center (AMROC) within the Rolls-Royce First Network, a status attained in late 2023. The engine, meticulously overhauled by Cadorath, powers a Bell 206L3 helicopter, completely refurbished and freshly painted by Meridian Helicopters. The helicopter was handed over to a lease customer in February 2024, showcasing the capabilities of Cadorath in providing end-to-end aviation solutions.

Cadorath's journey as a Rolls-Royce partner began over two decades ago when it was designated as an Authorized Repair Facility (ARF), specializing in single part repair and overhaul services. This extensive experience has positioned Cadorath as a leading support facility for the Rolls-Royce M250 and RR300 turbine engines, known for their extensive inventory and high-quality service. This expertise is a testament to Cadorath's commitment to delivering value and support that is integral to the success of operators worldwide.

The transition to complete engine and module overhauls was a strategic step for Cadorath, enhancing their range of services in the turbine engine sector. "Progressing to full engine and module overhauls was a natural evolution in our mission to provide comprehensive turbine engine support," said Gerry Cadorath, CEO of Cadorath. "Our priority, post-AMROC designation, has been to assemble a team of the finest technicians, ensuring the continuation of the exceptional quality and reliability that our clients have come to expect from Cadorath."

In response to the new AMROC designation, Cadorath has initiated the construction of a new 15,000 square foot facility in Broussard, LA. This state-of-the-art center, augmenting the existing single part repair facility, will focus on engine support services, underlining Cadorath's commitment to excellence and innovation in the aerospace industry.
